14. Return to Hotel		10:30PM

RUG Conference 2010

Tuesday

March 16

Meeting Room: Salon Imperial

Lunch Room: Café Viapol

Agenda

<p>1. Presentation 1:</p> <p><u>Flemish water distribution 'RTAP-ized'</u></p> <p>The "Vlaamse maatschappij voor watervoorziening (VMW)", which is the largest Flemish water distribution company, has chosen Ferranti and RTAP to replace their legacy telemetry system. Main project focuspoints were integration of new, iec104 based, RTU's and letting them coexist with the old RTU's which will be replaced over the coming years. Furthermore one of the projects goals was minimizing the impact on the operators.</p>	<p>Willy Lyssens, N.V. Ferranti Computer Systems S.A.</p>	<p>9:00-10:00AM</p>
<p>2. Coffee Break</p>		<p>10:00-10:30AM</p>
<p>3. Presentation 2:</p> <p><u>Extending an existing Secure Process Control Network – Thoughts and Observations</u></p> <p>Over recent years there has been a great deal of attention directed towards making the process control world more secure from the threats that exist in 'Cyberspace', using products such as those provided by Industrial Defender.</p> <p>New process control systems can be designed with cyber security elements incorporated, and old process control systems can have cyber security components fitted to them in order to make them more secure.</p> <p>This paper will raise some of the issues that can be encountered, and should be considered, when a secured process</p>	<p>Chris Berendt, Drax Power Limited</p>	<p>10:30-11:00AM</p>

control system is extended by the attachment of new SCADA systems.		
<p>4. Presentation 3:</p> <p><u>APMS – 15 years of Power Station Control</u></p> <p>The Advanced Plant Management System (APMS) is built on the foundation of Rtap. This system was devised to provide a Power Station Specific HCI and software centre for integrating diverse data collection systems and advanced applications. The presentation will briefly show the development of the system and the uptake of it by many UK coal-fired power stations as they refurbished their complete control systems. It will pictorially compare the old operator desks with the new and show the current state of the product.</p>	Chris Dicken, RWE npower	11:00-11:30AM
5. Lunch		11:30-1:00PM
6. Presentation 4:		1:00-2:00PM
7. Coffee Break		2:00-2:30PM
8. Tour of Seville Metro Control Centre		3:30-5:00PM
Additional Information		
Delegates are responsible for their own dinner arrangements tonight.
